

## QC-S300 Programable Collator

A full-color touch-screen control panel makes the Standard QC-S300 easy to use and increases production. The QC-S300 features cover/tab insertion, preset stop, split-tower programming (when using double-bin capacity) and continuous operation. This makes the Standard QC-S300 a versatile friction-feed collator. The split-tower programming can automatically divide the number of feed bins by two, allowing one set of bins to feed while the other is loading. Once the bin is empty, the collator switches to the second set of feed bins to keep the collator running. We have a low-price guarantee on all our paper collators. Order your Standard QC-S300 today!

### Features

- Connect to F40, SPF-9, SPF-9A, MF-1, and PS-P61 machines.
- Expands up to 30 feed bins.
- Collate up to 3,900 sets per hour.
