

New Océ TDS100 Large Format Copier Produces Instant, High Quality Copies Whenever Needed to Improve Workflow

Flexible, Affordable and Easy-to-Operate Copier is a Logical Choice for a Wide Variety of Deadline-Driven Business Environments

September 14, 2005, Chicago – Océ (Nasdaq: OCENY), a global leader in digital document management and delivery solutions, today introduced the new Océ TDS100 large format copier for easy, high quality copying from all types of originals. As today's businesses face a need to increase technical document workflow productivity to meet shorter deadlines, the Océ TDS100 meets users' demands for quick, easy copying. The Océ TDS100 is always ready for instant use, and the Océ "green button" means one-touch operation for copies are right the first time, every time.

Quick Copies at the Point of Need

The Océ TDS100 is suited for a wide range of business environments such as architectural, engineering and construction (AEC) firms and decentralized printing environments within larger organizations. While today's technical document workflows are largely digital, many users still require instant copies at the point of need – whether from hard copy originals, inkjet plots or manually corrected drawings. The Océ TDS100 copier consistently produces high quality copies, and Océ's radiant fusing technology eliminates warm-up time – contributing to faster copy turnaround to satisfy urgent timelines.

Accommodates a Variety of Work Settings

"Increasing time pressures in many businesses means people can't wait for delivery of drawings in a few hours or the next day. Quick, quality copies are needed instantly. The new Océ TDS100 meets this need because it fits into just about any workplace setting such as an architect's office, a town planning department or a trailer on a construction site. Its operation is easy and intuitive so it can be used by anyone. That's a real plus for businesses that require simple, cost-effective ways to improve their workflow," said Sal Sheikh, Vice President, Marketing, Océ Wide Format Printing Systems division of Océ North America, Inc.

Easy, Intuitive Operation

Easy, efficient operation is a key feature of the Océ TDS100. The copier is designed to make it easy to produce high quality copies every time, without relying on special skills or training levels of the user. The clear user interface makes copying straightforward because the Océ "green button" automatically optimizes all the main settings. Additional user settings are available to fine-tune results.

A Flexible, Affordable Investment

The Océ TDS100 offers a choice of system configurations to accommodate a range of user needs, including:

- Sheet feed single- or multi-copy
- Tabletop or floor-standing
- Automatic feed with one or two media rolls

Copying on the Océ TDS100 is cost-effective because it reduces the need for outsourcing and saves costs compared to reprinting on an inkjet printer. And, because the system's energy consumption is very low, it can be left on standby for instant use whenever needed without concern about high energy costs.

Availability

The new Océ TDS100 is now available. For more information, call Océ at 800-714-4427 or visit www.oceusa.com.

About Océ

Océ is a leading provider of digital document management technology and services. The company's solutions are based on Océ's advanced software applications that deliver documents and data over internal networks and the Internet to printing devices and archives – locally and around the world. Supporting the workflow solutions are Océ digital printers and scanners, considered the most reliable and productive in the world. Océ also offers a wide range of display graphics, consulting and outsourcing solutions.
