SB-07 Perfect Binder Press Release

FOR IMMEDIATE RELEASE Contact: Neal Swanson, 978-470-1920
June 20, 2006

STANDARD PREMIERS AUTOMATED SB-07 PERFECT BINDER *Automation + Speed at up to 3,200 Books per hour*

(Andover, Massachusetts) – At Graph Expo, October 15 – 18 in Chicago, Standard Finishing Systems will launch the new Standard Horizon SB-07 Perfect Binder. Designed for short-to-medium run-length POD and commercial print book markets, the SB-07 seven-clamp binder features automated operation, push-button simplicity, a small footprint, and high-quality production perfect binding.

The SB-07 can be run as a stand-alone binder or as a complete binding system with in-line three-knife trimming when connected to the HT-101 Three-knife Trimmer. The SB-07 is designed for single-person production of up to 3,200 books per hour, with complete changeover and set-up performed in less than 3 minutes. Standard features include a 10.4" intelligent color touch-screen control console, automatic air-suction cover feeder that handles a wide range of cover materials without marking, automated in-line cover scoring, and job programming.

According to David Reny, managing director, Standard Finishing Systems, "Horizon has staked a claim as the unsurpassed leader in perfect binding automation, having deployed more automated binding technology worldwide than any other supplier. The SB-07 supports that claim further, and continues with their strategy to bring productivity, performance, and advanced automation to every corner of the bindery."

Standard Finishing Systems, a division of Standard Duplicating Machines Corporation, is based in Andover, Massachusetts. Standard, a leading supplier of print finishing systems and reprographic equipment, markets its products through a network of independent dealers in the United States and Canada. For more information, call 1-877-404-4460. Or, visit the Standard website at www.standardfinishing.com.
